Reference: MB Docket No. 3-15, request for waiver

Dear Mr. Maher,

Central Wyoming College, licensee of KCWC-DT, requests a waiver of the interference protection deadline for the following reasons:

1. Central Wyoming College has on file with the Commission a request for a minor modification(BNPEDT-20060314 AEN) to its CP(BNPEDT-20000427ACL) which would allow the use of a side mounted panel array as opposed to the top mounted 12 bay bat-wing antenna in the original license application.
2. Central Wyoming College has nearly completed installation of transmitting facilities which will fulfill the use-it-or-lose-it requirements of paragraph 78 of *the Second DTV Periodic Review Report and Order*. Unfortunately, we have been unable to complete the air handling installation due to a shortage of qualified contractors. Wyoming is in the midst of a construction boom and contractors are booked several months in advance throughout the building season. Without adequate air handling, we cannot run the transmitter without overheating. We anticipate being able to complete the air handling system for our full power digital transmitter by late October.

Pending resolution of these two issues, Central Wyoming College is anxious to begin broadcasting at its fully licensed power of 60 KW. Thank you for your assistance.

Sincerely,

Bob Connelly, Transmitter Engineer
Wyoming Public Television
